ASSESSMENT RESOURCE SUMMARY

Unit Details	HLTAID009 Provide cardiopulmonary resuscitation	
Assessment Type	There are 2 summative assessments for demonstration of competency for this unit. Both assessments must be completed satisfactorily for the student to be determined as “competent”. Students may re-sit either assessment once only, after which a performance review will be conducted by the Training Manager.	
Assessment Methods	Demonstration of practical skills – documentation of incident Written multiple choice assessment Assessments meet the requirements of the Australian Resuscitation Council for CPR training	
Last Modification Date	27.04.2021 Pre-course Quiz 02/04/2020 CPR multichoice Jan 2021 CPR Demonstration April 2021	
Unit Summary		
This unit of competency describes the skills and knowledge required to Provide Cardiopulmonary Resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines. The skills and knowledge described here relate specifically to Providing Cardiopulmonary Resuscitation (CPR) and do NOT address other aspects of resuscitation, life support or first aid.		
Prerequisite		
There are no recommended pre-requisite units for this competency		
Possible Co-requisite Units		
There are no recommended co-requisite units for this competency		

Submission Policies for Written Work

Plagiarism is a form of cheating. It is taking and using someone else's thoughts, writings or inventions and representing them as your own. Plagiarism is a serious act and may result in a participant's exclusion from a module or a course. When you have any doubts about including the work of other authors in your work, please consult with your facilitator. The following list outlines some of the activities for which a participant can be accused of plagiarism:

- Presenting any work by another individual as one's own unintentionally
- Handing in work markedly similar to or copied from another student.
- Presenting the work of another individual or group as their own work.
- Handing up work without the adequate acknowledgement of sources used, including work taken totally or in part from the internet.

What about Copyright?

You must be careful when copying the work of others. The owner of the material may take legal action against you if the owner's copyright has been infringed. You are allowed to do a certain amount of copying for research or study purposes. Generally, 10% or one chapter of a book is acceptable, where the participant is studying with, or employed by, an educational institution.

ASSESSMENT MAPPING DOCUMENT

Elements / Performance Criteria	
1. Respond to an emergency situation	
1.1	Recognise and assess an emergency situation
1.2	Ensure safety for self, bystanders and casualty
1.3	Assess the casualty and recognise the need for CPR
1.4	Seek assistance from emergency services
2. Perform CPR procedures	
2.1	Perform cardiopulmonary resuscitation in accordance with ARC guidelines
2.2	Display respectful behaviour towards casualty
2.3	Operate an automated external defibrillator (AED) according to manufacturer's instructions
3. Communicate details of the incident	
3.1	Accurately convey incident details to emergency response services
3.2	Report details of incident in line with applicable workplace or site procedures
3.3	Maintain privacy and confidentiality of information in line with statutory and/or organisational policies
4. Evaluate the incident and own performance	
4.1	Recognise the possible psychological impacts on self and other rescuers and seek help when required.
4.2	Contribute to a review of the first aid response as required

Foundation Skills essential to performance

Performance Evidence	Assessment
<p>Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.</p> <p>There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:</p>	
<p>Managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise.</p>	<p>CPR Demonstration</p>
<p>Managed, in line with ARC guidelines, the unconscious, nonbreathing adult, including:</p>	
<p>performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor</p>	<p>CPR Demonstration</p>
<p>followed the prompts of an automated external defibrillator (AED) to deliver at least one shock</p>	<p>CPR Demonstration</p>
<p>demonstrating a rotation of single rescuer operators with minimal interruptions to compressions</p>	<p>CPR Demonstration</p>
<p>responding appropriately in the event of regurgitation or vomiting</p>	<p>CPR Demonstration</p>
<p>Handing over to emergency services</p>	<p>CPR Demonstration</p>
<p>providing an accurate verbal report of the incident</p>	<p>CPR Demonstration</p>
<p>Reviewing of the incident</p>	<p>CPR Demonstration</p>
<p>Managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:</p>	
<p>performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.</p>	<p>CPR Demonstration</p>

Knowledge Evidence	
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:	
Guidelines and procedures including:	
Relevant ARC Guidelines to managing the unconscious breathing casualty and non-breathing casualty and provision of CPR	CPR Demonstration
potential incident hazards and risk minimisation processes when providing first aid	CPR Demonstration multichoice
infection control procedures, including use of standard precautions and resuscitation barrier devices	CPR Demonstration multichoice
requirements for currency of skill and knowledge	multichoice
first aid codes of practice	multichoice
applicable workplace or site procedures relevant to the provision of first aid	CPR Demonstration
Legal, workplace and community considerations, including:	
duty of care requirements	CPR Demonstration multichoice
own skills and limitations	CPR Demonstration multichoice
consent and how it relates to the conscious and unconscious casualty	CPR Demonstration
privacy and confidentiality requirements	CPR Demonstration
awareness of potential need for stress management techniques and available support for rescuers	CPR Demonstration
Considerations when providing CPR, including:	
upper airway and effect of positional change	CPR Demonstration
appropriate duration and cessation of CPR	CPR Demonstration
appropriate use of an AED	CPR Demonstration
safety and maintenance procedures for an AED	CPR Demonstration , multichoice
chain of survival	multichoice

how to access emergency services	CPR Demonstration
Techniques for providing CPR to adults, children and infants including:	
how to recognise that a casualty is unconscious and not breathing normally	CPR Demonstration
rate, ratio and depth of compressions/ventilations	CPR Demonstration
correct hand positioning for compressions	CPR Demonstration
basic anatomy, physiology and the differences between adults, children and infants relating to CPR.	CPR Demonstration

ASSESSMENT CONDITIONS	
Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.	All students are described a scenario that could be realised in their actual environment
Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.	
Compression and ventilation skills must be demonstrated on resuscitation manikins in line with ARC guidelines for the purpose of assessment of CPR procedures.	Students are always trained and assessed on manikins that's are designed for use in resuscitation training.
Assessment must ensure access to: <ul style="list-style-type: none"> • adult and infant resuscitation manikins in line with ARC guidelines for the purpose of assessment of CPR procedures • AED training devices. • personal Protective Equipment (PPE) 	Students are provided access to resuscitation manikins, defibrillator trainers – varying types including IOS APP and Android devices as well as gloves and other PPE as required including face shields for rescue breaths and pocket masks
Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.	All relevant equipment is provided to students
Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge contained within this unit.	As required
